

Kanji Gold

Kanji Gold is a free flexible MS Windows(TM) flash card program for learning Japanese Kanji. Some of its features are listed below. It is well worth checking out at

<http://web.uvic.ca/kanji-gold/>

Kanji Gold Features (Version 2.10 June 14, 2004).

The revised program contains several improvements and a bug fix. With a Japanese word processor like JWPCE you can easily customize your kanji and vocabulary studies to match any text you are currently using. The program is suitable for all levels of Japanese study.

Features:

- Automatic and customizable review system.
- Custom color selection.
- Kanji choices available in On , Kun and English.
- All Level 1 and Level 2 Japanese Kanji (about 6000).
- Compounds sorted into Grade levels (0 -9) kanji. (over 44,000 compounds).
- Custom Dictionaries for compounds (can be made with JWPCE).
- Custom Dictionaries can be used for vocabulary study.
- Custom kanji lists and dictionaries (can be made with JWPCE).
- Includes Kanji lists for many popular kanji texts (with page numbers).
- **Kanji POPUP** feature that automatically flips through kanji and/or compounds while you are using other programs.
- Unique **kanji study list** method to help in memorization of Kanji.
